BITS CONSULTING LLC uses a wide range of data security measures to maintain the confidentiality and integrity of your personal information. However, given the nature of the Internet, we would like to draw your attention to the fact that there may be security weaknesses in the transmission of data via the Internet (e.g. communication via e-mail), and that complete data protection from third parties is not possible.

Ensuring the security of Personal Data is achieved, in particular:

- 1) Determination of threats to the security of Personal Data during their processing in personal data information systems;

- 2) Application of organizational and technical measures to ensure security of personal data during their processing in personal data information systems, necessary to meet the requirements for the protection of personal data, implementation of which ensures the established by the Government of the Russian Federation levels of protection of personal data;
- 3) The use of duly approved conformity assessment procedures for information protection tools;
- 4) Evaluation of the effectiveness of measures to ensure the security of personal data prior to the commissioning of the information system of personal data;
- 5) Accounting of personal data storage media;
- 6) Detecting facts of unauthorized access to Personal Data and taking measures;
- 7) Restoration of Personal Data modified or destroyed as a result of unauthorized access to it;
- 8) Establishing rules for access to Personal Data processed in the information system of personal data, as well as ensuring registration and recording of all actions performed with Personal Data in the information system of personal data;
- 9) Control over the measures taken to ensure the security of personal data and the level of protection of personal data information systems.
